

Welcome on behalf of the Clerking team to circuit racing, this document takes the place of your mandatory new drivers briefing, but if you have any questions the Clerking team are all friendly experienced volunteers and available on 07305 041990 during the event.

We would usually start the face-to-face briefing (after a bad joke) by making sure you knew the location of signing on and scrutineering, but as they are currently virtual, you just need to be mindful that these can be time consuming if they return when we reach the new normal.

We try to run at least 20 minutes ahead of timetable so please listen for paddock announcements and if drivers from your race start to move, it is a good indication that so should you. The assembly area is on the Melbourne loop, as you enter the assembly area you will need to allow time to pass noise control and some administration. The entrance to assembly is at the rear of the paddock near to where you first entered the paddock originally.

On your first lap please make note of the locations of the flag points, these are marked by the waving of green flags, so you have no reason to miss a flag signal. It is essential that you make note of the flag point on the finish line, as waving a flag from here with your race number is the only way we have to communicate with you, it is also the chequered flag point at Donington. Therefore it is important you remember your race number as it will be shown to all cars along with the warning flag.

The pit lane speed limit is 60KPH, please check your mirrors when moving to enter the pits, also respect the white blend line when leaving the pits and be mindful that the cars on circuit will be much faster than you as you re-join. Please use your right hand mirror when joining the circuit as you will be coming directly onto the normal racing line.

Finally, a couple of points that will help keep us all safe, stay off the grass and don't overtake under red or yellow flags.

If having read these and the other instructions you have received, you have any questions please call the club before the event or please call 07305 041990 during the event.

Enjoy your racing!

Mike Heath  
Clerk Of The Course
